

Introducing the Harmony Bariatric,
a robust and modern recliner.

Meticulously Designed Bariatric Seating

Our Design and Development team have created a perfectly-crafted bariatric chair that caters for patient care, safe handling and dignity, alongside the safety of both patient and carer which are fundamental to modern healthcare.

The chair combines exceptional functionality and height carrying capacity to support the treatment of bariatric patients.

Removable Seat Wrap

Removable duvet enabling easy access to the pressure / postural inserts, fixed seat box and the standard memory foam within the duvet is removable.

Waterproof Fabric

Our waterproof fabrics combine maximum abrasion resistance with a specially-engineered low friction surface which minimises the risk of shear.

Reflex Foam

The Harmony Bariatric is built with Reflex Foam seat cushions as standard, giving maximum comfort and support in a sitting position.

Electric Leg Lift

All Harmony Bariatric chairs come with an independent, electrically-powered leg lift as a standard feature.

Removable Seat Wrap

Poor seating can affect a client's ability to function properly, so having the correct seating position is vital, and this starts ensuring the stability of the pelvis.

The Harmony Bariatric allows for the installation of a variety of cushion inserts that allow a wide range of pressure and postural cushions to enhance a client's support and posture.
