

Introducing the Havant, a modern and extremely versatile recliner.

Designed With Exceptional Comfort And Functionality

Our Havant has been designed and developed to allow the user to recline the chair into a sleeping position. With a reclining back of 85 degrees, you can get the user into a lay flat position.

Drop-Arm Facility

The Havant has a drop arm facility that caters for side transfer and access onto the chair. This facility can be added to either side or both sides of the chair.

Waterproof Fabric

Our waterproof fabrics combine maximum abrasion resistance with a specially-engineered low friction surface which minimises the risk of shear.

Recovery Position

This safety system allows users who suffer from seizures and fitting attacks to be reclined into a recovery position within seconds.

Drop-Arm Facility

On a Tilt-In-Space action the drop arm facility will sit 50mm above the seat plateau, as this will ensure enclosure of the scissor action that can become exposed due to the nature of a Tilt-In-Space action.

Full Recline Action For Maximum Comfort And Emergency Recovery

Size Matrix		Sizes shown in inches	
Seat Height	16	→	22
Seat Width	18	→	31
Seat Depth	18	→	24
