

Introducing the Harmony, the posture and pressure integrated management chair.

Designed for Long Term Health Conditions

The whole purpose in the design of the Harmony is to develop a chair that can offer excellent pressure management options with postural support, whilst at the same time offering comfort in a stylish chair that blends into any environment.

Removable Seat Wrap

Removable duvet enabling easy access to the pressure / postural inserts, fixed seat box and the standard memory foam within the duvet is removable.

Waterproof Fabric

Our waterproof fabrics combine maximum abrasion resistance with specially-engineered low friction surface which minimises the risk of shear.

Lateral Back Cushion

As a standard feature the Harmony chair comes with a Split Back cushion with Lumbar support offering greater support for the user.

Each Harmony incorporates a clean flat arm and is manufactured to the specification detailed by a trained assessor ensuring that the clients changing pressure and postural requirements are catered for.

Poor seating can effect a client's ability to function properly, so having the correct seating position is vital and this starts by ensuring the stability of the pelvis.

The positioning involves a combination of increasing / customising the chair back rest to accommodate most spinal deformations.

The Harmony can help resolve problems associated with:

Forward Sliding, Pelvic Obliquity, Abduction, Lordosis, Kyphosis, Pelvic Tilt, Lumbar Support, Adduction and Slouching.

Size Matrix	Sizes shown in inches	
Seat Height	16	→ 22
Seat Width	17	→ 31
Seat Depth	16	→ 24
Back Height	26	→ 36
Arm Height	4	→ 11
